

Welcome to Term 2

Mrs Johns & Miss Delisser

English

Enjoying and Retelling Stories

Students will listen to and respond to a range of traditional tales, exploring language and images used by authors to entertain audiences. Students will create and present retells using images and beginning writing behaviours.

Maths

Students will learn counting sequences, compare quantities and connect number names, numerals and collections. Students explore shapes and sort them into groups.

Science

Our Material World

Students will explore the materials and observable properties of everyday objects. They will use their knowledge of science to select materials to make a house for the Three Little Pigs.

HASS

My Family Story

We will investigate familiar ways family and friends remember past events that are important to them.

Students will explore the following inquiry question: ***What is my history and how do I know?***

Physical Education

Students will develop the fundamental movement skills of rolling, underarm throwing, chest passing and catching beanbags and large balls. Students will be assessed on their coordination and movement patterns when rolling, underarm throwing and catching as well as their rule following and fair play.

Digital Technologies

Students will learn and apply Digital Technologies knowledge and skills through guided play and learning tasks, including the use of Bee-Bots. We will explore how digital and information systems are used for particular purposes in daily life.
