

Year 4 Term 1 Overview 2023

Mathematics

Students apply a variety of mathematical concepts in real-life, life like and purely mathematical situations. Students will further develop their understandings of:

- Number and place value up to 10 000
- Fractions and decimals
- Using units of measurement
- Chance and data representation and interpretation

Students recall multiplication facts and solve problems using appropriate strategies.

Design Technologies

Students will investigate the suitability of materials, systems, components, tools and equipment for specific purposes. They will repurpose a clothing item with other recycled materials to create a useful item.

English

Students will be studying the narrative, 'The Twits.' They will investigate how language features, images and vocabulary choices are used for different effects within a story. They will create another chapter of the narrative for an audience of their peers.

HASS

Students analyse the experiences of contact between Australia's First Peoples and others, and the effects these interactions had on people and the environment.

French

Students will learn how to give information about themselves such as their name, age and where they live. Students will also learn the language of classroom routines, for example, greetings, following instructions and asking for things.

Science

Students will explore natural processes and human activity that cause weathering and erosion of Earth's surface. Students relate this to their local area, make observations and predict consequences of future occurrences and human activity.

The Arts

Students explore connection to Country/Place through Dreaming stories and Before Before Time stories as inspiration.

P.E

Students will develop coordination, strength and balance through gymnastics. They will perform continuous movement sequences that incorporate the elements of movement; body awareness, effort (flow) and space awareness.
