

# 2C & 2D

# Mrs Cook and Miss Delisser

Term 1 2025

## English

Students will explore a variety of imaginative texts that use language in different ways to introduce characters and settings. They will also give an oral presentation about their favourite character from a familiar story, sharing their opinion and describing the character. During their presentation, students will focus on using language features like noun groups and will practice speaking with the right volume, expression, and pace.

## Science

For chemical sciences, students will explore different materials and how they can be combined. They will learn to choose materials based on their properties and purpose. Students will ask questions about how objects and materials change, and they'll describe these changes when creating something for everyday use. They will follow instructions in guided experiments, make predictions, and record their observations. Throughout the unit, students will use scientific language to share what they have learned.

## PE

**Taught by Mrs Marks**

During PE in term 1 students will develop a range of locomotor and stability skills through gymnastics rotations. They will also develop object control skills using tennis racquets and balls. Students will identify and apply rules to stay safe and strategies to work with others and play fairly. Students will be assessed on hand-eye coordination with tennis racquets, balance and locomotor skills and sportsmanship.

## Maths

Students will:

- Continue developing their number skills, including addition and subtraction, understanding place value, representing numbers in different ways, and practise counting.
- Learn how to find and describe the position of different objects or features on a flat surface. They will also practice moving things around by following simple directions or paths.
- Explore different ways to gather, organize, and present information. They will then make inferences and explain data collected.

## Technologies

**Taught by Mrs Wilkinson**

It's Showtime!

In this unit, students will explore the characteristics and properties of materials and components that are used to produce designed solutions. They will design and make a puppet with moving parts to use in a puppet show.

## Drama

**Taught by Mrs Anderson**

Students make and respond to drama by exploring photographs and/or stories of family and friends as stimulus.

## HASS

**Taught by Mrs Vaughn**

Students explore how people are connected to places.

## Health

**Taught by Mrs Vaughn**

Students learn about safe and unsafe situations and how to take responsibility for their own safety. They explore clues to recognize safety in different situations and understand the emotions they may feel in both safe and unsafe scenarios.
