Living adventure
In this unit, students make links between external features of living things and the environment where they are found. They explore a range of habitats and consider the differences between healthy and unhealthy habitats. Students predict how change to habitats can affect how the needs of living things are met.

Year 1 will be learning about Number and place value - sequence numbers, investigate the twos number sequence, represent 2-digit numbers, investigate parts and whole of quantities, show standard partitioning of ‘teen’ numbers, investigate subtraction, represent and solve simple addition and subtraction problems. In the second half of the term, students will have the opportunities to develop understandings of data representation and Interpretation and to explore chance. We will also be working with aspects of measurement and geometry.

Exploring Emotion in Picture Books.
Students listen to, read, view and interpret written picture books, including stories from Aboriginal and Torres Strait Islander cultures. They identify emotive content and justify their interpretations of the stories. In Unit 2, the children will listen to, read and view a range of picture books in order to analyse and explain a familiar story.

In this unit, students will develop an understanding of terms indicating the passing of time which are frequently used in stories and conversations about the past and how these terms are used to describe dates and changes that have personal significance.

Mr Dunning and Mrs Easlea

The Arts
Students will work with their perceptions, thinking and imagination to explore elements of colour.

Technology
P1/D and 1E students will be designing and making a time machine.
