English — Appreciating Poetry
In this unit, students listen to, read and view a range of poems, songs, anthems and odes from different times, to create a folio of responses analysing authors’ use of language and its impact on the message and ideas of text.

The Arts — Dance
Students will participate in a dance program that requires them to learn, rehearse and use movement sequences to express ideas.

History - First contacts: Investigating the impact of colonisation
In this unit students will investigate what life was like for Aboriginal peoples and Torres Strait Islander peoples before and after the arrival of European traders, explorers and settlers.

Technology
Students will generate design ideas to meet the demands of a set task. They will produce items from their ideas using repurposed (recycled) materials.

Science - Now you see it
In this unit, students will investigate the properties of light. They will investigate reflection angles, refraction, how we perceive the colour of objects and the relationship between light source distance and shadow height.

Geography - Exploring how places are changed and managed by people.
In this unit students will investigate how people influence the human characteristics of places and the management of spaces within them and how the impact of bushfires or floods on people and places can be reduced.

Health - Personal identity.
Students will investigate how individual personality, relationships, beliefs, responsibilities and social contexts shape personal identity.

Mathematics
In this unit, students apply a variety of mathematical concepts in real-life, life-like and purely mathematical situations.
Students have opportunities to develop understandings of number and place value, money and financial mathematics, location and transformation, symmetrical designs and enlarge shapes.
