Maths

This term students will apply a variety of mathematical concepts in real-life and mathematical situations. Students will continue to develop their problem solving skills to solve multiplication, division, addition and subtraction problems. They will also practice mapping and graphing skills.

English

This term students will read and view a range of Australian poetry. Students will analyse poems by exploring language features, purpose and context. At the end of the term students will learn how to write letters during our last unit for the year.

Science

What's the matter?
In this unit, students will investigate how a change of state occurs between a solid and a liquid by adding or removing heat. Throughout this unit students will conduct experiments, pose questions, make predictions and communicate their findings using scientific language.

Geography

Protecting places near and far
Students will be investigating the similarities and differences between homes and communities in different countries. They will also investigate what makes a place special and why some places need to be preserved for future generations.
